ICANN Public Forum

# Performance – IETF

# Performance – IETF

Internet-Draft Queue Size : 7 January 2004 through 31 March 2005

# Items of Note Since Cape Town

- New hire: Barbara Roseman, Operations Mgr
  - Extensive background in industry and ICANN
  - Responsible for day to day operations, including supervision of root management request processing
  - Staffing plan adjusted based on experience
- Request tracking system implemented
  - Current system is temporary, but all data will be transferred when new system is ready

# Items of Note Since Cape Town

- TLD Manager's mailing list re-implemented
  - First message went out 17 December as promised
  - Allocation messages have been sent, as discussed at the last meeting
  - New messages will be sent regularly
- ccNSO <> IANA Working Group
  - Similar to existing group for the IETF
- Congratulations to AfriNIC

# Plans for the future

- Recruiting proceeding very well, excellent candidates
  - Anticipate that current staffing plan will be completed this month
- New Template System for TLD Managers
  - Coding is done, currently filling in explanatory text
  - Security elements added per discussion with TLD managers at regional forums
- PGP for Root Management, and other requests
  - Important role for the regional ccTLD associations
  - ICANN staff eager to set up “key signing” meetings
