

Dear Registry Operator,

As you may be aware, ICANN org is proceeding with the bulk transfer of domains from the de-accredited registrar Net 4 India (IANA# 1007).

Over the next 10 days, ICANN will select a gaining registrar via the [De-Accredited Registrar Transition Procedure](#) (DART-P). Once the registrar is identified, you will receive an update via email. The selected gaining registrar will also be posted on the [Bulk Transfers](#) webpage.

Once selected, you can expect the gaining registrar to reach out to Registry Operators with affected domains in order to coordinate the bulk transfer. During this time, we continue to appreciate your help by not deleting any expiring domain names that are registered with Net4.

For more information, please refer to the recent announcement here: <https://www.icann.org/en/announcements>

Thank you for your continued attention to this matter,

Russ Weinstein Vice President  
GDD Accounts and Services  
Internet Corporation for Assigned Names and Numbers (ICANN)
