Subject: Notification - Upcoming SLA Monitoring System Probe Node IP Address Changes

Dear Colleagues,

This message is to inform you about an upcoming change to the SLA Monitoring System probe node IP addresses. This change will take place on 27 April 2018 at 17:00 UTC.

The following IP addresses will be added:

185.40.235.217

2a00:dd80:10::188

The following IP addresses will be removed:

185.94.190.180

2001:ac8:26:a::2

Please update your systems allowing access for the new IP addresses. This is required for the monitoring of your TLD(s) to work as described in Specification 10 of your Registry Agreement.

The MoSAPI and the IP address lists located at <https://tld-monitor.icann.org/nodes.csv> and <https://tld-monitor.icann.org/nodes.json> have been updated with these changes. We will not be using the new IP addresses to monitor your TLD(s) until 27 April 2018.

Best Regards,

Technical Services and Registry Services Teams
Global Domains Division
