Subject: Notification - Upcoming SLA Monitoring System Probe Node IP Address Changes

Dear Colleagues,

In our 7 November 2017 communication, we notified you of an upgrade to our Service Level Agreement (SLA) Monitoring System platform. That upgrade included replacing all 40 of the probe nodes. The transition period following the SLA Monitoring System platform upgrade is now complete. The old probe nodes have been taken out of service as of 13 January 2018.

The lists of IP addresses of ICANN's Registry SLA monitoring probe nodes at <https://tld-monitor.icann.org/nodes.txt>, <https://tld-monitor.icann.org/nodes.csv>, <https://tld-monitor.icann.org/nodes.json>, and MoSAPI are now updated.

ICANN is no longer using the IP addresses for the SLA Monitoring System probe nodes listed below. Please update your systems accordingly, as soon as possible.
